

Digital Device Gifting Scheme

Unlock your potential with free technology

The Digital Device Gifting Scheme is funded by the Household Support Scheme. It helps low-income families and individuals by providing a range of devices (smartphones, tablets and laptops) for learning and managing budgets.

This scheme is for low-income individuals or families who meet the following criteria:

- household income below £25,000
- no access to suitable digital device at home
- successful completion of an eligible adult learning course in digital skills
- priority will be given to families with school-aged children, elderly members, individuals with disabilities and care leavers over 18.
