Live by yourself and want to get connected?

Feeling confident online can make life much easier – but we understand it's not always simple to get started.

Age UK Hull and East Yorkshire's Digital Connection Service offers free support to help you use smartphones, tablets, laptops and other smart devices and make the most of the internet, safely and securely.

Being online can give you more opportunity to do things like access local services, keep in touch with family and friends, or find out what's on in your area – and lots more!

Whether you're a complete beginner or you just want to brush up your skills, our friendly one-to-one or group sessions are a great way to build your confidence.
